Heavy Jet Marketability Analysis by Models

Notes

1) "Supply and Demand Indicator" provides a snapshot of each model's market position using the percentage of aircraft for sale relative to its fleet size, the number of aircraft sold relative to the average number for sale, the average overall model days on market relative to the overall market average, and the standard deviation (which is an indicator of spread) of the overall Marketability.

2) "Demand Imbalance" indicates an excess of demand. "Supply Imbalance" indicates an excess of supply.

3) The graph shows an average of monthly "Average Days on Market" in the last 4 quarters.
